

# 4<sup>th</sup> Year PSE

## Study Skills

Below is a brief outline of each of the lessons along with some suggested additions:

### Week 1

- What is study skills ? Click on [M.U.R.D.E.R](#)
- Improving memory, concentration etc are among numerous super sites for discussion under the studying category. Click on [Study Guide and Strategies](#)
- You can create your own discussion points through considering the other sites such as Preparing, Learning, Project Management etc

### Week 2

- Consider specific subject requirements. Again by scrolling down the web site Study Guide and Strategies you will come across – Reading Skills, Writing skills, Maths, Science and Technology, **Web truth** on evaluating the quality of a web site etc.

### Week 3( Only if you think Necessary)

- Using books – the internet – as an effective information source. In order to promote the use of the internet as an excellent source I have block booked Mr.Avarl's computing room. This could form a good lesson on it's own with the **Web truth** section mentioned above. Check out appropriate web sites BEFORE you take your class, I have listed some below. Why not select a topic or person and have an '**internet race**' to find out a specific piece of information.

Other suggested web sites:

[Studying Tips for Tests](#)

[Plan for Success](#)

[Where to Study / How to Study](#)

I will also make available the Progressive Study Skills pack which has lesson by lesson notes etc. **You** will have to make photocopies for your class before the lesson.
